

SYSINFO.OCX ERROR FIX

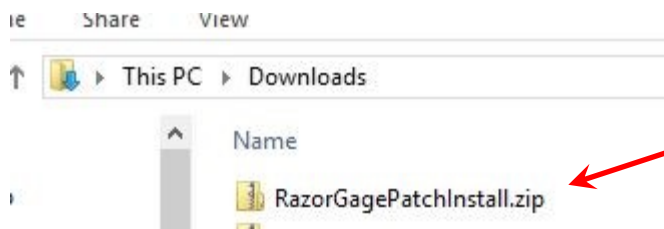

Step 1: Update Windows Defender.

To get to Windows Defender first right click on the Windows Start button. For touch screens hold down on the button and then release. Next go to control panel and select Windows Defender.

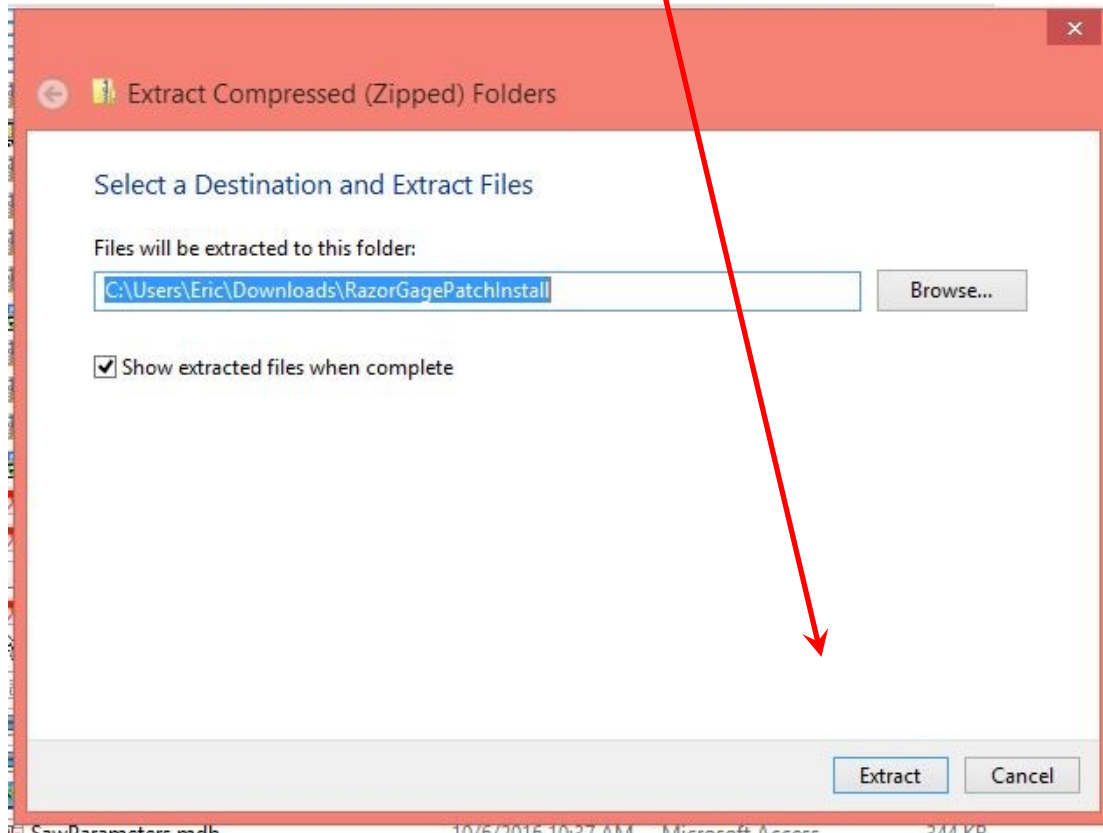

In Windows Defender select the update tab. Next press the update definitions button.

Step 2: Download the program patch from our website. www.razorgage.com

At the webpage select the downloads button at the top of the page. The patch will be called RazorGagePatchInstall.zip. It will be located at the bottom of the technical information section. Download the patch. Next go to your downloads folder and extract the RazorGagePatchInstall.zip file.

Once it is extracted open the folder and run the setup file. Once the patch is installed successfully your program should be fixed.
