APS Automatic Optimizing Upcut Saw System

RazorGage APS runs on Windows so networking is easy. Intuitive software is displayed on a 22" touch screen.

Inkjet print directly on parts or print paper labels to keep parts organized.

Intelligent front roller clamps don't retract between cuts; clamp incoming side only then switch to outfeed side near end of board eliminating scrap parts caused by half clamping leading or trailing edge.

Aluminum option includes aluminum cutting blade and dual misters to lubricate both sides of blade.

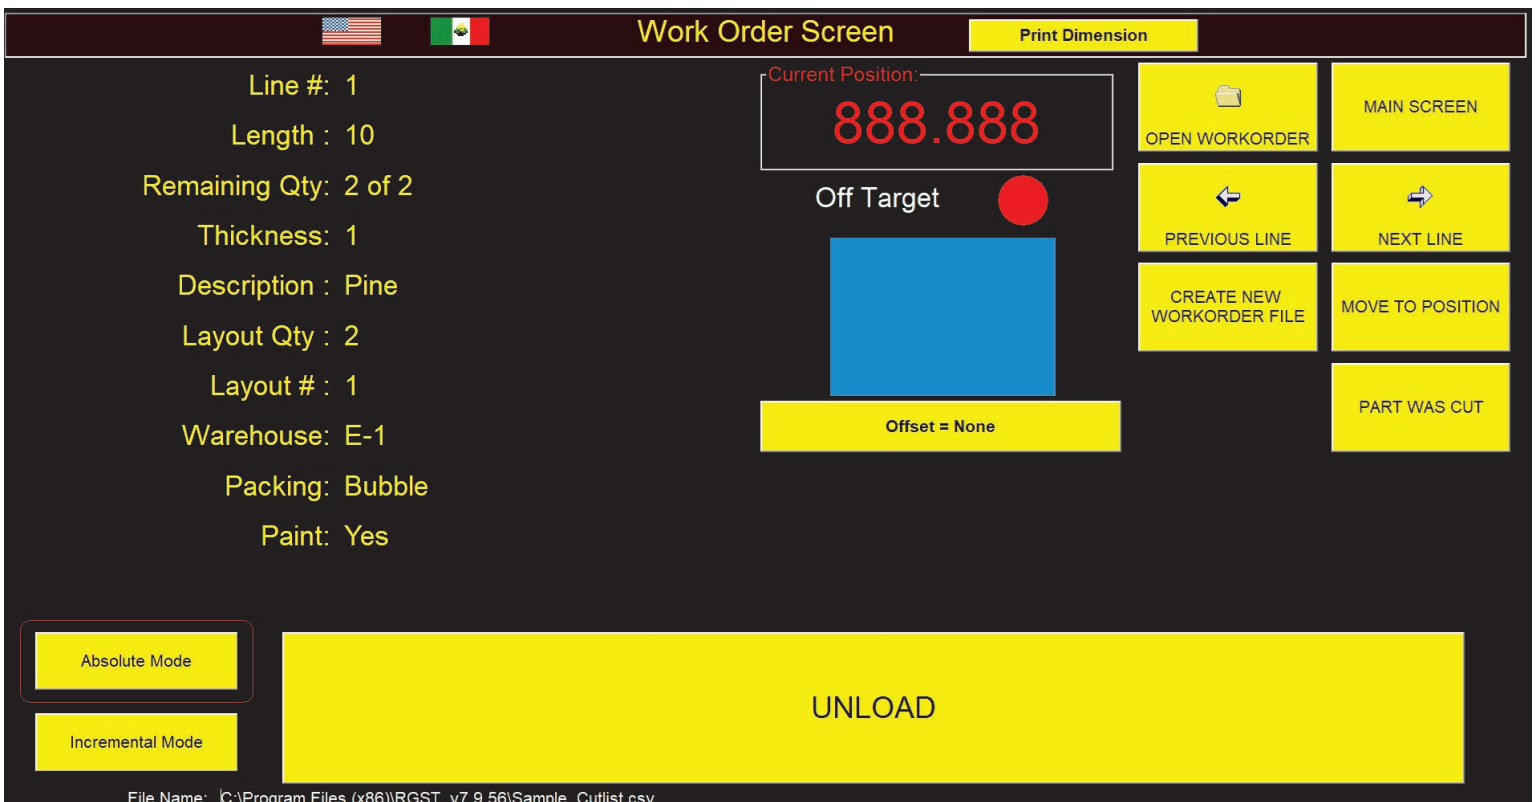

7.5 HP Direct drive 500mm blade slides on Hiwin Linear bearings for maximum rigidity. Optional 600mm blade can cut up to 1" thick by 20" wide or 6" x 6".

Ask us about combining secondary operations such as drilling or punching.

The Auto Pusher Screen lets you define a cut pattern for a given stock length, save it, and run it whenever it's needed. You can store thousands of these.

In the Work Order Screen, cutlists can be created either locally or on another device and transferred via USB, Ethernet, Wifi, or Bluetooth. You could even create a cutlist on your phone and email it to the RazorGage if you wish.

Batch Screen is good for running many parts of the same length. Store part numbers containing length and material, select, & run. Indicate a bundle quantity at run time and the parts counter will increment accordingly.

The Autolist Screen opens and sorts cutlists into groups of like material type, color, job, you name it. Then it optimizes to maximize yield. It can also run pre-optimized cutlists. Extremely intuitive yet very powerful. See the video on www.razorgage.com for more.

Specifications

Saw Motor Specs	7.5 hp (enclosed fan cooled) available in 208-230-460Vac 3-phase
Power Requirement	10 Amps 120 VAC plus one of the following: 230 VAC, 3 phase, 30 Amps OR 460 VAC, 3 phase, 20 Amps
Dust Collection Ports	Two 4" diameter (102 mm) requiring 600 cfm (17 m ³) minimum for dry light materials. Other material may need higher velocity/pressure
Compressed Air	Requires 80 psi (5.5 bar) at 5 cfm (0.14 m ³) air filtered to 2.5 microns (oil and moisture free). Use industrial air dryer, rated for cfm (CM) flow. No lubrication required for air components. Air must be lubricant free.
Motor RPM	Variable from 2200 to 3450
Arbor	1.000 inch
500 mm Blade for Wood	500mm x 120T x 1" Bore x 23°ATB/5°ASF x Plate .128 x Kerf .172
500mm Blade for Aluminum	O/D 500mm or 19.68" x Kerf 3.5mm or .137" x Plate 3.0mm or .118" x Bore 25.4mm or 1.00" x Teeth 140 D Type Tip Grade Sash Pro X Expansion Slots Five.
24" Blade for Wood	24" Dia. x 144T x 1" Bore x 23°ATB/5°ASF x Hook 22° Plate.138 x Kerf.186
24" Blade for Aluminum	24" Dia. x 200 Teeth x 1" Bore x TCG x Hook 6° Plate.138 x Kerf.174
Push Force	200 lb at 10 inches per second
Maximum Push Speed	50 Inches per Second
Stock Length Capacity	Up to 60 feet
