Opening Files.zip

You have chosen to open:
Files.zip
which is: Compressed (zipped) Folder (876 KB)
from: https://storage-ec2-906.sharefile.com

What should Firefox do with this file?

Open with Windows Explorer (default)

Save File

Do this automatically for files like this from now on.

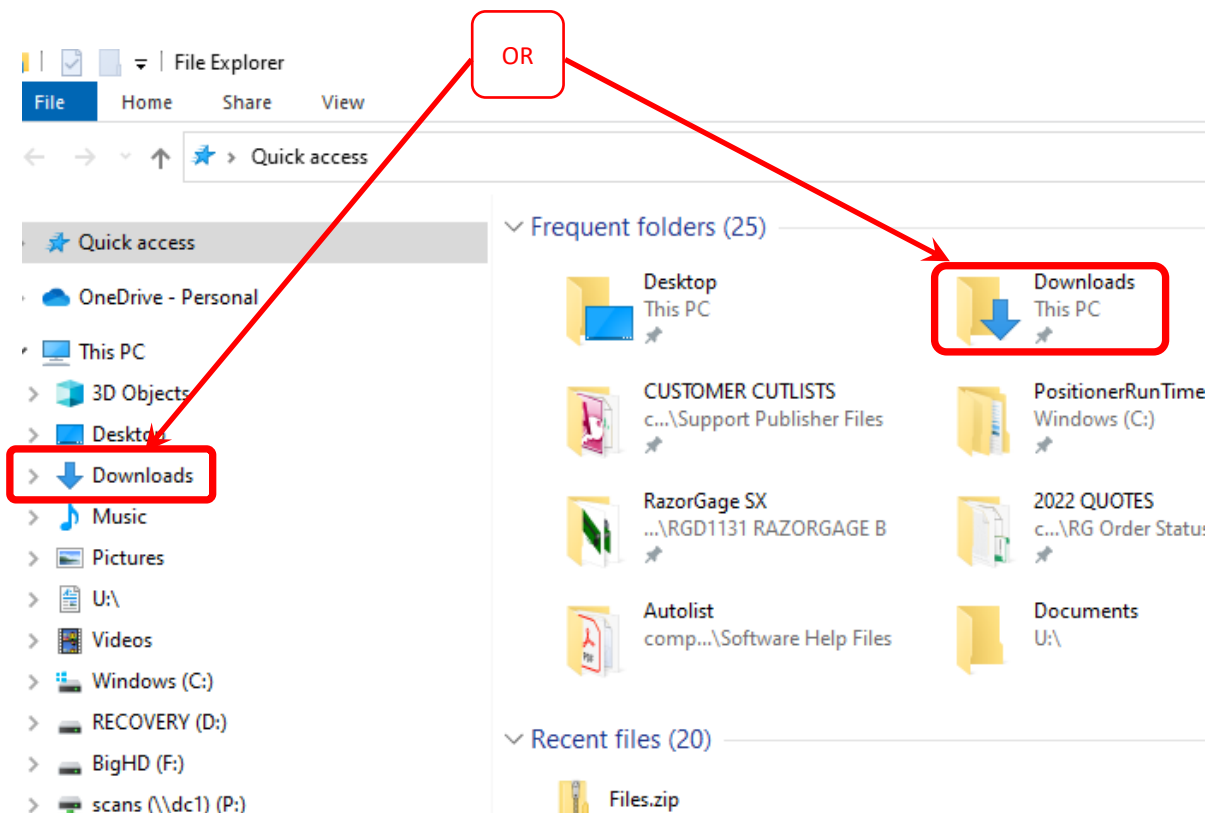

OK **Cancel**

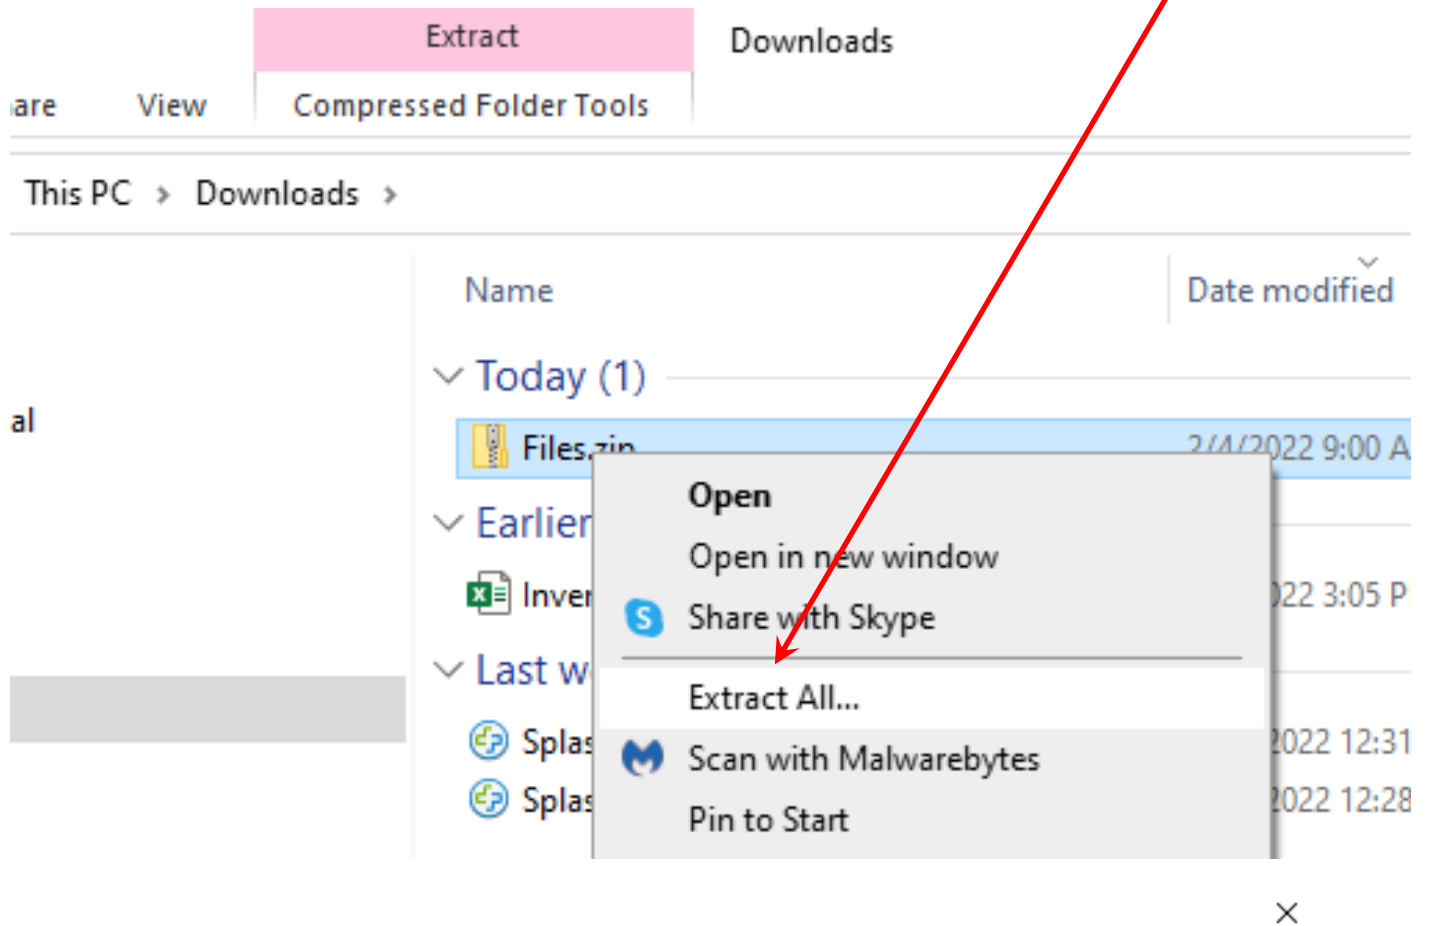

Now that you've downloaded the file open Windows File Explorer by clicking this icon on the bottom edge of your Windows desktop

Windows Explorer should look something like the picture below. Click Downloads in one of the places shown below.

Right click on the zipped folder we downloaded earlier and choose Extract All..

← Extract Compressed (Zipped) Folders

Select a Destination and Extract Files

Files will be extracted to this folder:

C:\Users\shoshor\Downloads\Files

Browse...

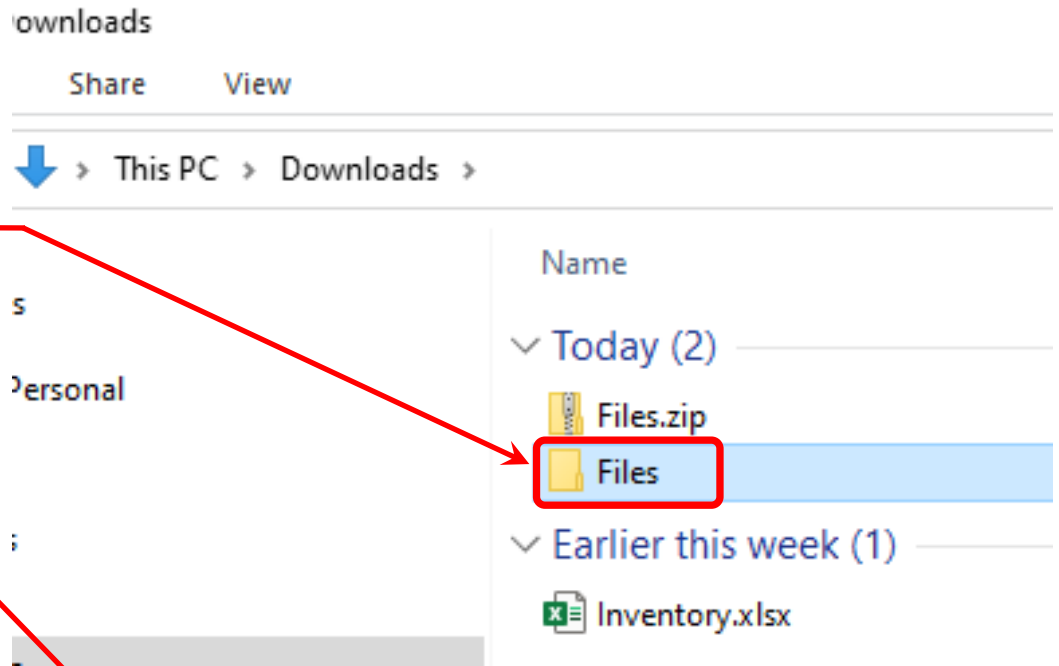

Show extracted files when complete

Your path will look different here. Choose a different path or use the default. Just remember where you put it if you choose something other than Downloads.

Extract

Cancel

When the zipped file is extracted, if you chose to extract it to the Downloads folder it will appear as a non-zipped folder like this. Double click that file to view the contents.

C:\Users\shoshor\Downloads\Files

PLPDef.mdb

There should be two files in the download. PLPDef.mdb and Layout.mdb. These will be copied to the RazorGage either via USB drive or over the network. At the machine, shut down the RazorGage software and use Windows File Explorer to navigate to C:\PositionerRunTimeFiles\RGST. Paste the two files into C:\PositionerRunTimeFiles\RGST replacing the existing files of the same name. Restart the software and the software should be mapped for your sample file.
